Hospitality/Tourism/Casinos

Improved Guest Experience & Brand Loyalty

The iPad is used for creating customer engagement (e.g., decrease guest check-in times) to drive repeat business and boost revenue and thus enhancing your brand experience. This enables retail and digital signage; increased customer loyalty, and supports operational efficiency.

Healthcare

Faster Service Delivery - Telemedicine

The iPad is used for patient enrollment and "line busting" where forms are filled out prior to arrival by the patient which means less waiting and faster treatment/care. Knowledge management offers patients secure access to their own medical records, plus public information on facilities and services.

Natural Resources

Mapping and Monitoring Resources

The iPad can deliver real time and remote monitoring, resource mapping, which leads to the efficient deployment of personnel and equipment/facilities. Soil surveys for agriculture, national weather and climate information, camping, game, and fish licenses and education can be moved to mobile applications.

Law Enforcement & Public Safety

Quicker Emergency Response

The iPad can be used by law enforcement for evidence collection, online regulations, and forms. Emergency management and response can use mobile apps to access real-time data such as 911 calls, residences of sex offenders, and locations of fire hydrants. Tribal attorney offices and justices can replace paper based systems with electronic case dockets and court agendas.

Digital Public Library

Digital Reading Rooms & Preservation of Native Cultures

Public libraries are redefining themselves and looking a little different: book-less. Libraries are now focused on providing citizens with access to collections of electronic titles or e-books. With Native bilingual apps, Native history, culture, and publishing become effortless.

Paperless Agenda

Paper Replacement

The iPad is replacing paper agendas in governing bodies as an easy way to help reduce costs of paper, ink and administrative man-hours spent assembling the documents. It's also enhancing communication among officials and providing access to real-time data. The iPad allows for edits and addendum's to be added, making adjustments easier and more cost efficient versus the method of reprinting agendas or manually adding additional sections.

Mobile Case Worker

Clipboard Replacement

The iPad has become the premier choice for replacing clipboards and laptops for mobile inspectors. Replacing these devices saves agencies money by reducing hardware costs, enables efficiencies by allowing inspectors to more effectively complete an inspection and enhance communication between management and field employees.
